Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2, 4-11, 15, and 28-29 are rejected under the judicially created doctrine of double patenting over claims 1-13 of U. S. Patent No. 6,330,763 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: Kern et al. ('763) claims a sliding door, a first seal

Art Unit: 3634

attached to a first end of the door, a second seal disposed along a second distal end of the door such that when the door is in a closed position, the door is thereby sealed by the seals.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-11, and 15 are further rejected under 35 U.S.C. 102(b) as being anticipated by Clark. Clark discloses a first panel (C), a second panel (D), a first and second seal (18 and 19) engaging one another in the closed position such that the foamed seal is compressed into sealing contact, a tilted track (13 and 14) mounting the first and second panel, and an actuation system (52) driving the first and second panel to a closed position.

Claims 28 and 29 are further rejected under 35 U.S.C. 102(b) as being anticipated by Saucier. Saucier discloses a plurality of panels (12-16) having extruded sealing elements (22-26) attached to a front portion of the panel and extruded sealing elements (18-21) attached to a rear surface of the panels such that as one panel is

Art Unit: 3634

moved linearly the rear portion sealingly engages a front portion thereby closing an opening.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patent to Kern et al. ('763 and '097) disclose elements similar to that of the applicants invention.
